SONORK

Enterprise IM Solutions

Increase **Productivity**, ensure **Security** and enhance internal **Communications!**

Sonork EIM creates efficiencies and reduces costs for any type of organization.

Enhancing productivity, workflow and security across all areas of your business has never been easier or more cost effective.

Sonork is the turn-key solution for quickly and effectively deploying Enterprise Instant Messaging and Collaborative Information Management networks within your organization's existing Intranet or VPN environment

Real-time messaging and data transfer with colleagues, suppliers and customers delivers immediate ROI - dramatically improving workflow, information management and customer services

Sonork will begin saving you time and money the minute it is installed...

Unlike other EIM solutions, the Sonork concurrent-usage licensing model allows for unlimited user accounts, desktop and mobile clients. In many cases, it costs less than email to deploy and maintain.

Immediate Tangible ROI
Reduces costs associated with long distance phone and fax usage, travel, overnight deliveries and email server overhead.

Extends Current Assets
Real-time communication and presence management improves workflow and maximizes the efficiency of existing human resources, service departments and network applications.

Minimal Requirements
Further reducing deployment costs, Sonork requires no additional infrastructure and minimal software.

Low Maintenance Cost
The intuitive user interfaces for client and server administration make set-up, deployment and maintenance easy and hassle free.

Going Far Beyond EIM
Sonork localizes both people and information on a network, ensuring instant accessibility to your most valuable resources.

Information Management
Automates the flow of information through structured database-driven WebApps, reducing the use of paper forms and arduous physical record keeping.

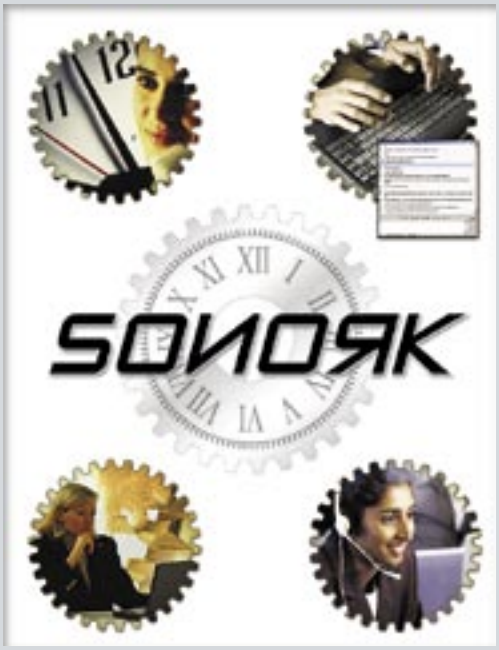
Broad Extensibility
Sonork APIs and highly extensible client engine are designed to integrate with existing systems to add any one of many data transfer and localization based features.

Easy integration with your existing systems, company databases and Web applications:

- Integrated HTTP engine to control and distribute database driven Web applications (WebApps) through your Sonork powered network.
- WebApps empower you to better interact with existing databases to collect, store, organize and disseminate structured information.
- Easy to integrate digital forms, database applications, pre-formatted instant messages and intranet functions, etc.
- Unifies external applications on a business network (e.g. intranet, email, CRM systems, billing and HR systems).
- Sonork meshes with current systems to help raise the value of your company's exisitng human capital and technology investments.

"Sonork can lay the foundation for delivering a wide array of enterprise applications that incorporate all types of valuable corporate data including text, Web content, and multimedia"

-Steven Vonder Haar, Enterprise Media Analyst, Interactive Media Strategies



About GTV

Founded in Spring 2000, GTV has evolved to become an industry leading provider of Enterprise Instant Messaging and distributed network solutions. Our robust and extensible Sonork Technology is deployment-tested and in use by thousands of companies worldwide.

We offer a wide variety of unique enterprise-grade products, ranging from secure private network collaboration tools and telecom enabling solutions, to turn-key public network systems. We provide support, optional managed hosting and professional development services to complement all of our products.

GTV is a forward-thinking company that welcomes synergistic opportunities with both large and small organizations. Our business model encourages companies and individuals to develop and commercialize software built on Sonork Technology, and operate services within the public networks powered by it.

We remain committed to continually developing cutting-edge software and providing the highest levels of support for our customers. Please contact us with any questions you may have regarding our products, reseller opportunities or partnership opportunities.
